Final Presentation

ICE4HU

here to slay

The Team

Şura Nur Ertürkmen
Project Manager – Backend Developer

Created the models need of backend and database, built the RESTful API structure.

Ayşe İrem Yalçın
Software Architect – Backend Developer

Provided the conection between database, backend and frontend. Wrote CRUD functions.

Ayça Akyol
Configuration Manager – Frontend Developer

Wrote some of the frontend pages as such as Create Survey. Applied Router connections.

Zübeyde Civelek
Software Tester – Frontend Developer

Applied design implementation of web pages. Created Login and Register pages.

Selahattin Can Ölçer
Software Analyst – Frontend Developer

Built mechanical base functions for frontend. Created Add Course page.

Technologies

- ASP.NET

- MS SQL

- React.js

- HTML / CSS

- Razor CSHTML

Challenges We Faced

1 The frontend team had trouble applying the GUI as CSS code but with practice, we overcame this challenge

2 Backend team has trouble understanding MVC architecture because it was our first time.

3 The whole team had trouble connecting backend and frontend because they were very different fields.

Thanks

Thank you for listening to our presentation and your work in this term :)
